

# TRUE HEALTHCARE REFORM

Patients regular utilization of  
*chiropractors as primary care physicians* reduces the need for:

**Hospitalization by 60.2%**

**Hospital days by 59%**

**Pharmaceutical usage by 85%**

**Outpatient surgeries and procedures by 62%**

**Overall global health care cost by 50%**

This according to a clinical and cost utilization study conducted by an independent physician association done over a 7 year period and that included doctors of all licenses.

J.M.P.T. Vol30, Issue 4, pages 263-269, by Dr. Richard Samat, M.D.
