A JEFF HAYS FILM PRODUCTION

DoctoRed

A DOCUMENTARY

From the award winning producer who brought you *On Native Soil* comes a shocking new documentary on the monopolization of our medical system, and explores the following topics:

- *Traditional medicine's* ***ignorant refusal*** *to admit the effectiveness of chiropractic care, nutrition, etc.*
- ***Overuse*** *of surgery and pain medications, leading to overdoses and addiction.*
- ***Adverse side effects*** *of vaccinations and correlations with* ***autism.***

Doctored reveals the unseen tactics of these "influencers" in an investigation that leads to the highest levels of the American Medical Association (AMA) and reveals an alarming portrait of deception and criminality.

Doctored takes us into the courtroom with five chiropractors who, having been labeled "an unscientific cult,' fought back and won a landmark verdict.

Their heroic story forms the backdrop of one of the most personally compelling documentaries ever. Because of their bravery, the medical industrial complex is no longer blocking access to safe natural alternatives, pill popping is giving way to smarter preventative care, and purveyors of sickness are being shoved aside, resulting in a healthier life for us all.
