**ABN Form
Sample Script**

Are you unsure how to explain the ABN form to your patients?

Following is a brief script, simple and to the point how to explain what services will or will not be covered by their Medicare policy.

"I need to inform you that Medicare does not cover x-rays or examinations and they do not cover maintenance care even though we know it is beneficial to you the patient. It is difficult for us to know when Medicare will or will not reimburse for your adjustments. As required by Medicare you must acknowledge that we have informed you that your services may not be covered here today by having you sign this form.

Further, your supplemental insurance if you have any may cover a portion of these charges."
